

Designing the Grey Grid for Information Society

TENTH INTERNATIONAL CONFERENCE ON GREY LITERATURE

Science Park Amsterdam, Netherlands

December 8 - 9, 2008

Sponsors:

The needs and demands of Information Society are in constant state of change and flux. Information overload, information loss, information-on-demand are among just a few of the many factors confronting information professionals, practitioners, and net-users on a daily basis. To a great extent, grey literature is the cause of all this. For the past two decades grey literature has grown exponentially in relation to commercial information services. The information community realizes that the current information infrastructure is not resolved, and that the scale and challenges to system-to-system performance when dealing with the scale and diversity of information, data, document types, collections, and subject areas linked to grey literature. As such, interoperability becomes de facto a
