FINAL PROGRAM

OPENING SESSION

For over three decades, authors and researchers in the field of information have addressed the many challenges in publishing grey literature. In so doing, they have confronted core issues. Is grey literature published literature, and if so, how is it published; how does it differ from commercially published literature; and foremost how can it stay abreast with the technological developments that will ensure its access, uses, and preservation for scholarly research and citizen science well into the 21st Century.

Introduction: Kristina Womack, National Library of Medicine, United States
